Chelsea, which is 16 miles from the nearest railroad station and with only stages as a means of communication with the outside world, is to have a more rapid means of transit this summer, at least. An automobile is to be put into service to convey passengers daily to and from the South Royalton railroad station. It is expected that the trip which now is made by stage in about two and one-half hours, will be made by automobile in 45 minutes. An experiment run has already been made, and the time was some minutes less than an hour. Daily trips will be begun soon.

Fred Cardell, of Warren, was pleasantly surprised a few days ago when he was notified that he had been left about \$14,-000 by a rich uncle who had died in Texas a short time ago, leaving an estate valued at about \$212,000 which will be divided among the surviving relatives.

The matter of raising funds for a new church building for St. James' Episcopal parish, Woodstock, was considered at the annual meeting of the parish, and it is expected that a new edifice will take the place of the present structure within a very few years. The building is to be constructed of stone, with slate or metal in four annual payments; the construction not to be begun untill \$20,000 is pledged. The report of the treasurer distance of nine miles, to Peter Pickle, of showed that the parish was free from West Derby, who will take immediate debt and had a surplus of over \$400 in

the treasury. Several stones in the shed of the E. D. Ellis company, at Northfield, that were finished and ready for shipment, were the edge. Strange sounds are heard damaged to the extent of \$200 by some one who entered the shed during Friday night and chipped off the corners. How Germ Diseases Start.

People With Weak Stomachs in a Con-tinual State of Danger. Nearly all disease germs that find lodgment in the system gain entrance with the air we breathe, or through our

food and drink. If the stomach and digestive organs be weak, so that food does not readily digest, they will contain a sour, slimy termenting mass, an ideal spot for the disease germs to grow and spread

through the whole system.

The days of the parlor are fast going. There was once a time when every family, no matter how poor, had its parlor. And generally the parlor was a most useless place, but it was the pride of the housewife. The Observant Citizen remembers some time ago when the lady of the house insisted that he should see "her parlor." Her husband smiled good naturedly, and they both led the way to a big front room which was locked. The door was unlocked, and the parlor got its first fresh air in months. The little family had expended much money on the parlor. Everything was new but the stuffed birds under glass cases. The design of the carpet was wonderful in that it consisted of bright red roses. One felt like stepping into a bed of flames. A horseshoe sofa, very erect, was the principal article of furniture, while at the windows were the stiffest lace curtains you ever saw. The room had a musty smell due to long confined air. It was "luxury imprisoned" on a small scale and the finest example of the old time useless parlor.-Manchester Union.

A Bottomless Pit. There is a bottomless pit in the mountains of Hualalal, back of Kailua, in the Hawaiian Islands. It is about four feet in diameter. The pit is peculiar from the fact that it sucks in the air with remarkable force. Pieces of paper placed over the mouth do not float gently down, but are suddenly drawn in and disappear with startling rapidity. The air rushing into the pit can be distinctly felt by people standing on also. Every night the inhabitants of the locality distinctly hear a noise simresumes for another five seconds.

Addresses In Persian.

The addresses in Persian upon letters which go through the postoffice at Calcutta are often quaint and puzzling. An Indian paper recently translated one as follows: "If the Almighty pleases-Let this envelope, having arrived at the city of Calcutta, in the neighborhood of Calootolah, at the counting house of Sirajodeen and Hahdad, merchants, be offered to and read by the happy light of my eyes, of virtuous manners and belover of the heart -Meean Shaikh Inayut Ally, may his life be long. Written on the tenth of the blessed Rumzan, Saturday, in the year 1266 of the Hegira of our Prophet, and dispatched at Bearing."

The Postmark. Great Britain, it is said, can, without fear of contradiction, claim the honor of having originated the postmark. The first one, which was used in London as long ago as 1660, was a very simple affair, consisting of a small circle divided into two parts. In the top portion were two letters indicating the month, while in the lower half the day of the month was shown. No endeavor was made to denote the year, and it is only by the dates of the letters on which the mark is impressed that it is possible to fix the date of its use.

WORN OUT

and

LIGHT SOILS

What to use for a

FERTILIZER

A great deal is said about the treatment of rundown farms. Lands in Vermont are too cheap in most sections to make it pay to reclaim run-down farms by the use of expensive commercial fertilizers, especially where the soil is light and sandy.

There is abundant evidence to justify the assertion that Salt used on dry, light, exhausted lands will draw to the earth the moisture in the atmosphere, thus keeping the roots of the plants in a healthy, growing condition; whereas without the use of Salt they dry up and the crop is oftentimes worth but little more than the expense of harvesting. It is not true, we think, that Salt can be profitably used on wet, heavy or clay

The location of Page's Hide House in Northern Vermont gives farmers of that section an advantage possessed by few localities, for, when cash accompanies order, he sells Fertilizing Salt at \$3.50 per ton. which is only a little more than half the price at which ordinary salt can be afforded.

We find from a multitude of testimonials received that an Oat Crop on worn out light soils, is more than doubled by the application of salt, and we especially commend our salt to farmers who wish to raise this crop.

Mr. G. W. Lovejoy of Hardwick. Vt., one of the successful farmers of that town, tells his experience in the following language:

"I put 800 pounds of Page's Fertilizing Salt on two acres that the year before cut less than 300 pounds of hay, and sowed to peas and oats and raised ten one-horse loads. I put 1200 pounds on three acres that had been plowed and cropped about ten years and on that I had a heavy crop of oats and this year I put on 1200 pounds more. I used \$5.00 worth of salt this year and got a crop of oats worth \$50.00. It pays to buy Fertilizing Salt."

Farmers should send in their orders early, addressing them to
